

VISHING

IS A TYPE OF SCAM

It is a scam done by phone where criminals impersonate the identity of a third party (person or company) **in order to get the victim to provide private information or money.** Sometimes using high-tech elements, such as automatic voice simulation.

HOW TO AVOID IT?

If you receive a phone call about certain types of sales or suspicious information, **first verify if this is true** by contacting the person or entity to validate the information.

Do not give out your passwords or personal data to anyone.

Criminals can hide their number and appear with the name of whom they want to impersonate.

Be prudent **and stay alert by using common sense.**

Teach your family to not provide information to anyone.
