

# !OUR! GREEN LIGHT

**WAS AGAIN RECOGNIZED IN THE  
DOW JONES SUSTAINABILITY INDEX.**

Together with Grupo Argos we are part, for the eleventh consecutive year, of the Dow Jones Sustainability Index for having exemplary practices in economic, social, environmental and corporate governance areas.

On this occasion, we received a score of 87 out of 100 in the evaluation, which is the same as last year.

We also ranked **second** in the building materials industry thanks to the rigorous execution of our sustainability strategy, which is focused on business profitability, responsible production, building trusting relationships, and our shared value system. We also rank among the best in **the MILA Pacific Alliance index**.

Grupo Argos ranked **third** in the industry, consolidating its position among the leaders in the Global, Emerging Markets and MILA Pacific Alliance indexes.

## OUR HIGHLIGHTS:

- ▶ We **stand** out in the economic dimension thanks to our management on issues such as corporate governance, ethics and compliance, and cyber and information security.
- ▶ In social issues, we **highlight** our strategy and performance in occupational health and safety management, stakeholder relations and talent management.
- ▶ In the environmental dimension, we **excel** in our management of issues such as climate change strategy, eco-efficiency and our commitment to nature.

## ABOUT THE INDEX:

For nearly 25 years the Dow Jones Sustainability Index has evaluated companies worldwide based on sustainability criteria, awarding a distinction to those that perform outstanding and comprehensive management of their businesses.

Inclusion in the Index represents a seal of assurance and confidence for investors, customers, employees and all stakeholders, who are increasingly aligned with sustainable products, services and processes.

May these results continue to drive our commitment to comprehensive sustainability management, where incorporating global trends is becoming increasingly important, reflecting the evolving ecosystem of standards, methodologies, guidelines, recommendations and measurements in recent years.
